B-3, C-3, RT-3

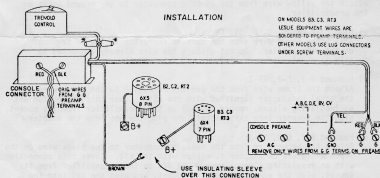

To Leslie Models: 122, 122V, 122RV, 142, 222, 222RV

The Leslie 8000 Console Connector Kit connects any of the consoles listed above to a single Leslie speaker. The kit includes a console connector and a single Tremolo-Chorale switch. It also contains all the hardware necessary for this installation.

Contents of Kit:	1 - 6X4 Adapter	048082	2 - Screw, 8 x 1/2	029132
	1 - 6X5 Adapter	048090	1 - Tremolo Control	
	1 - Console Connector	018432		015594 Brown
	1 - Instructions	034074		015602 Ebony
	5 - Insulated Staple	028464		015610 Ivory
	1 - Oil Tube	053025		
	2 - Screw, 6 x 1/2	029124	2 - Wire Nut	028076

To install the kit:

1. Attach the Tremolo-Chorale switch case to the wooden rail in front of the lower manual with the wood screws provided. Use the two mounting holes in each case which best center the wood screws in the rail.

2. Remove the console back, and pass the Tremolo control cable from the switch to the interior of the console in one of the following ways:
 - a. Push a small screwdriver over the felt dust seal between the lower manual and the knee panel. Pass the cable through this opening into the console. From the back of the organ, reach behind the tone generator and pull the cable through.
 - b. Run the cable down along the corner where the knee panel and the end of the console join, then under the generator compartment to the back. Cut a small notch in the edge of the bottom shelf, and pass the control cable through it.
3. Mount the console connector inside the rear generator compartment near the left-hand side of the preamplifier, using the wood screws provided.
4. Connect the Tremolo control cable to the brown POT cord from the console connector with the wire nuts provided.
5. Remove the wires from the "G-G" terminals on the preamplifier, and connect them to the screw terminals on the console connector.
6. Attach the red and black wires from the console connector to the "G-G" terminals on the preamplifier.
7. Attach the yellow wire from the console connector to any ground point on the preamplifier.
8.
 - a) Hammond A, B, C, D, E, BV, CV:
Attach the brown wire from the console connector to the B+ terminal on the preamplifier. Do not disturb the wire already connected to this terminal.
 - b) Hammond B-2, C-2, RT-2:
Attach the brown wire from the console connector to the black wire on the octal B+ adapter furnished with the kit. Cover this connection with an insulating sleeve, remove the 6X5 on the preamplifier from its socket, plug the adapter into this socket, and plug the 6X5 into the adapter.
 - c) Hammond B-3, C-3, RT-3:
Attach the brown wire from the console connector to the black wire on the 7-pin miniature B+ adapter furnished with the kit. Cover this connection with an insulating sleeve, remove the 6X4 on the preamplifier from its socket, plug the adapter into this socket, and plug the 6X4 into the adapter.
9. Replace the console back.
10. Connect the speaker using the cable provided with the console. Set the tone cabinet volume according to the instructions in the owner's manual. The installation is now complete.
